

# City of Biggs

**Agenda Item for the  
next regular City Council Meeting  
February 27, 2012, 6:00pm**

**To: Honorable Mayor  
And Members of the City Council**

**Date: February 22, 2012**

**From: Steve Speights, PE – City Engineer**

**Subject: Monthly Activity Report**

---

## **6<sup>th</sup> Street Bridge**

Caltrans has not released the NEPA document yet; maybe next week. Caltrans should also issue a notice of increase or preliminary engineering budget soon. This is to cover additive environmental work previously done.

## **Wastewater Treatment Plant**

Financing options are subject of separate staff report.

## **SunWest**

We have almost completed the first plan check for Phase 2 Improvement Plans. Phase 2 will extend curb, gutter and sidewalk on Bannock Street to the west side of 11<sup>th</sup> Street. Landscaping will also be added along that frontage. PG&E and Biggs/Gridley Electric are currently installing new facilities to allow demolition of existing gas mains and electric poles to make room for the new warehouse and loading area. New deeds have been recorded reflecting the new parcel configuration, so the lot line adjustment process is now complete.

## **RWQCB MUN Study**

We are attending meetings with other communities that discharge wastewater to agriculture drains. RWQCB is preparing a Monitoring Study of the effects of wastewater discharges on the drains and downstream waters. This effort is just starting, so will keep Council informed of progress and advantages/disadvantages of continued participation in the study. The City will no longer discharge to the ag drain upon completion of the WWTP Improvement Project.
